| ✓ Ready for use	✗ Fault
Flashes red every 48 seconds. At night the LED is dimmed: Everything is fine. Your Genius protects you.	Flashes red every 8 seconds. Fault signal every 48 seconds.
You don't have to do anything.	Please replace this smoke alarm and, if necessary, contact your supplier.

Alarm

Loud alarm signal permanently: Your smoke alarm has detected smoke. Danger!

Information in case of fire

- Warn your roommates.
- Leave the room / building immediately. Close all doors on your way out to prevent smoke and fire from spreading quickly.
- Stay close to the floor in case of dense smoke.

- Do not call the fire brigade (**emergency 112**) until you are safe.

- Check whether all persons have left the room / building.
- If for any reason you are unable to leave the room / building, close all doors, seal all cracks and slits and draw attention to yourself at the window.

- Only fight the fire yourself if you are not in danger.
